

HARD SIDED YURTS VS. SOFT SIDED YURTS	
Permanent structure	Temporary structure
Only 5-10% more than soft sided	Low cost
Insulated walls & roof with industry standard R-values	Non-rated insulation liner for walls & roof
Insulated glass windows	"Window" panes are vinyl
More durable & secure exterior	Canvas exterior is thin & fragile
50 - 100 year lifespan	5 - 15 year lifespan
Satisfies even CA fire codes	Not resistant to fires
Market standard for return on investment	Would not sell for a profit
Pre-fab floor system with subfloor	No floor system offered

BENEFITS OF MINDFUL LIVING STRUCTURES

- **COST EFFICIENT** - Surprisingly low costs. The marvels of prefabrication coupled with an amazingly efficient design, allows our buildings to be built at a cost less than most site built structures.
- **ALL WEATHER USE** - Built of solid materials like any other conventional structure. Our insulated buildings can be built in the warmest to the coldest of climates and still provide a cozy environment.
- **EASE OF CONSTRUCTION** - Over 25 years of building experience has helped us develop a prefabricated building that requires no special tools or master carpentry skills to construct.
- **CODE APPROVED** - With our 25 years of experience, we have structures throughout the US and internationally. Our structures have passed the building code requirements and received building permits for all of our clients.
